Quality Products for Quality Water

NEC Series Water Softeners

Features

- State of the art, top-mounted control valve with optimum service and backwash flow rates.
- User friendly, solid-state microprocessor control with all push-button settings.
- Timed, clock or Metered regeneration.
- Digital display of time of day, days until next regeneration, volume remaining, current flow rate, and total volume used (Totalizer).
- 12-volt output AC adapter provides a safe and easy installation.
- Corrosion resistant FRP resin tanks and polyethylene brine tanks.
- User-selected, Double-Backwash feature offers a more efficient regeneration and better resin cleaning.
- Soft water brine tank refill.
- Automatic Bypass during regeneration.
- Twin alternating systems available for continuous soft water supply (1-2” and 2” systems only).

For Restaurants
Dishes and glassware sparkle and linens and tablecloths will be cleaner and last longer when washed with soft water.

For Schools
Students and Faculty will appreciate the benefits of soft water in the cafeteria and the locker room.

For the Car Wash
Soft water lengthens the life of water-using appliances. Softened water maintains energy efficiency allowing maximum performance and profits from your equipment.

For Boiler Feed
Eliminate scale and increase energy efficiency.
Easily Eliminate Hard Water with the NEC Series

Hard water can make your life difficult. Hard water creates mineral scale deposits which can shorten the life of your pipes, water heater, washing machine, and dishwasher. Hard water deposits stain bathtubs and sinks, spot glasses and dishes, and leave your laundry looking dull and dingy. Put an end to hard water mineral deposits with a Marlo water conditioner. The NEC series water softener removes calcium and magnesium, the hardness minerals, leaving your water softer, cleaner and user friendly. Soft water saves you money. It pays to enjoy the benefits of a Nancrede Engineering water softener.

Over the years, we have built a reputation as an industry standard for high quality water treatment systems and equipment.

Nancrede NEC Series Softeners reflect that overall commitment to excellence, and are fabricated using field tested designs with a proven record of service reliability.

Nancrede NEC Series Water Softeners are designed to fit the requirements of many types of commercial and light industrial applications such as Apartments, Motels, Office Buildings, Boiler Feed, Condominiums, Schools, Laundromats and Car Washes.

Operating Specifications
Inlet Pressure Range: 25–125 psi
Temperature Range: 40–110°F
Electrical (Supply) Rating: 120VAC/60Hz (US) 220VAC/50Hz (Optional)

Take a look at the advantages of using a NEC water softener:

Simplicity
Uncomplicated, straightforward valve and brine system design coupled with rugged corrosion resistant tank construction ensures years of trouble-free field operation.

Efficiency
Precision regeneration cycle increases salt efficiency and assures minimal water usage.

Low Maintenance
NEC Series Softeners are fabricated using high quality components to minimize maintenance requirements. If the need for service should arise, all valves, distributors, and operational components are easy to reach. All components are standard and readily available from stock.
