Multi-Pass 200 Reverse Osmosis System

MPW's Multi-Pass RO design provides the ability to vary flow rate with changing influent water quality conditions and production requirements.

MPW’s Multi-Pass 200 Reverse Osmosis (RO) System provides onboard filtration and is a convenient production solution for removing dissolved solids, total organic carbon (TOC) and other colloidal contaminants. Operable in either single pass or double pass mode with nominal flow rates of 200 and 100 GPM respectively. The system offers full automation, touch screen controls, flexibility and reliability to meet your specific flow rate and effluent water quality requirements. MPW’s trained Field Service Technicians are available to assist with site evaluation, set-up, commissioning and operation.

Features
- Quick conversion to single pass or double pass operating mode
- Removes up to 99% of ionic contaminants and organics over 200 molecular weight
- 24-hour remote monitoring and DAS to ensure water quality parameters are met
- PLC controlled chemical feed systems for de-chlorination, pre-filtration, scale inhibiting and pH control
- 24/7 Logistics Department for dependable order placement and delivery coordination
- Full system automation / touch screen controlled
- Onboard filtration

Typical Applications
- Total dissolved solids reduction
- Organic compound reduction
- Colloidal silica reduction
- Demineralizer system pre-treatment
- Water system outage support
- Environmental improvement and waste discharge reduction
MULTI-PASS 200 REVERSE OSMOSIS SYSTEM

**INSTRUMENTATION**
- Max. Water Temperature: 110°F
- Min. Water Temperature: 35°F
- Inlet Turbidity: < 1 NTU
- SDI15: < 5
- Electrical: 480v AC, 3-phase, 272 FLA

**PRODUCT WATER**
- Single Pass Product, 45°F: Up to 300 GPM
- Double Pass Product, 45°F: Up to 150 GPM
- Recovery: 1 pass up to 75%, 2 pass up to 90%
- Rejection: Up to 99%

**CONNECTIONS**
- Inlet / Product / Reject: 4” camlock

**DIMENSIONS**
- Trailer: (LxHxW): 47’x8.5’x13.5’
- Operating Weight: 75,000 lbs

**REQUIREMENTS**
- Inlet, Product and Reject Flow Meters
- pH and conductivity meters
- Touch Screen Panel PC and PLC for Real-Time SCADA and System Trending
- Digital Pressure Transducers
- Electrical Efficiency - VFD Controlled Pumps

**TECHNICAL SPECIFICATIONS**
